COMMON QUESTIONS

If a parent is present in the room when treatment occurs, does this satisfy the requirement for a second Adult Participant to be present in the room?

A: Possibly. The parent **must** be an Adult Participant who has completed the *SafeSport Trained* Core. If the parent is not an Adult Participant, there is still a requirement for a second Adult Participant to be present during treatment.

If the second Adult Participant is in an adjacent room where they can see the treatment, does this satisfy the requirement for a second Adult Participant to be present during treatment?

A: No. The second Adult Participant **must** be in the same room as treatment.
