Para National Ranking System 101

Updated – December 2020

Purpose

The Para National Ranking System (NRS) is utilized by USA Archery (USAA) for the purpose of selecting athletes to the Para National Team, International Events, and USOPC Support Programs.

Eligibility Guidelines

The Para NRS is provided for USAA members in good standing with current approved Para national or international classification who have a valid U.S. passport. If an athlete does not have a valid U.S. passport they must have resided in the USA for one year while they are allowed to achieve ranking points and after the end of that year, they need to obtain written permission of the Member Association, if any, of the country from which he/she has a valid passport prior to competing for the USA.

If an archer does not have a current approved Para national or international classification at the time of the event, the archer can still accumulate ranking points as long as they obtain their approved national or international classification prior to the end of the last Para National Ranking Event of the year. If the archer is unable to obtain their approved national or international classification by the end of the final Para National Ranking Event, the archer will lose their ranking for that year.

Additionally, athletes must meet all eligibility and other requirements set forth in the United States Archery Team Selection Procedures.

Fundamental Components

National Event Single Arrow Average

- a. The athlete's Single Arrow Average from the Qualification Round(s) of USAT Qualifier Series Events will be used to calculate an athlete's Para National Ranking. The Single Arrow Average will consist of the average of the athlete's three best USAT Qualifier Series Events in which the athlete has fully competed as described in b and c of the fundamental components.
- b. If weather or schedule changes prevent the completion of a 72 arrow Qualification Round, the Single Arrow Average for the event will be calculated based on the total number of arrows shot. However, a minimum of 36 arrows must be shot in a round to use the Single Arrow Average for that event.
 - i. In the event that an archer withdraws prior to the completion of the Qualification Round, no points will be awarded.

- ii. Averages will be calculated to the nearest 1000th of a point (3 decimal places).
- c. Archers must shoot all elimination rounds for which they are eligible. If an athlete does not shoot the elimination rounds at one of the events, that event will not be included in the National Ranking.

Events to be factored into the Para National Ranking System

1. EVENT REQUIREMENTS

- a. An archer must fully compete in a minimum of three eligible Para USAT Qualifying Series Events, one of which must be the USAA Target Nationals or other substituted mandatory event as referenced in 1.b. in order to receive a Para National Ranking and to be eligible for International Events and USOPC programs the following year.
 - i. In the unpreventable situation that an archer is not able to compete in a required event for national ranking in their respective division the [Policy for Missing the Required Event](#) document outlines rules for approved exceptions.
- b. In years when there is a Para international event that conflicts with the USAA Target Nationals, one of the following events may be substituted as the mandatory event if approved by USAA:
 - i. Para WRE held in the U.S. with open registration; or
 - ii. Para World Team Trials; or
 - iii. First round of the Paralympic Team Trials

Modifications to the mandatory event requirement will be announced at the beginning of the year.
