

Policy for Wheelchairs, Adaptive Equipment, Agents and Service Animals Updated April 2023

This policy is intended to provide useful information for archers using a wheelchair, adaptive equipment, agent or service animal at a USA Archery sanctioned event. For purposes of this policy adaptive equipment will include wheelchairs, stools or V.I. tactile rigs, for example.

Para Classification Information

Archers **are not required** to be classified as a Para archer to shoot from a wheelchair or stool, due to injury or disability while competing in a **non-Para division** at a USA Archery sanctioned event. Likewise, archers using temporary mobility aids such as a knee scooter, crutches, etc. or a service animal are not required to be classified.

Archers who want to compete in a Para division must have at minimum a current Para national classification and have their classification card with them at events where they are registered to compete in a Para division. More information on Para classification may be found [here](#).

USA Archery Event Registration Options

Through the USA Archery event registration process, archers will be asked to indicate the type of adaptive equipment they require at an event and will also be provided the option to request to stay on the shooting line at an event.

This information will help event organizers to pre-plan lane assignments for the event.

Wheelchairs and Other Adaptive Equipment

The following rules will apply at USA Archery sanctioned events for non-classified archers who use a wheelchair or stool when competing in a non-Para division:

1. To comply with World Archery rules archers should utilize a wheelchair that is 1.25m (49”) or shorter in length. If the archer has a wheelchair that is longer than the length permitted by World Archery rules, they will need to indicate they have an oversized chair during the event registration process. Please note, oversized wheelchairs cannot always be accommodated by the event organizer within the field of play dimensions. All adaptive equipment should fit within the standard shooting space of 80cm for indoor events and 90cm for outdoor events to allow room for the archer shooting next to them.

2. While an archer is shooting, no part of the wheelchair, stool or other adaptive equipment can support the archers bow arm.
3. All other equipment used by the archer shall conform to World Archery rules for the division the archer is entered. Archers should always review [World Archery rules](#) prior to competing to avoid any issues at equipment inspection.

Agents

All archers (Para classified and non-classified) who require an agent to assist with retrieving and scoring arrows or who require other personal assistance should plan to bring an agent with them to each event at their own expense. The responsibility of securing an agent to attend each event is the archer's responsibility. The event organizer is not required to provide an agent. Agents will be required to complete and clear a USA Archery Background Screen and complete the U.S. Center for SafeSport training prior to the event to be able to access the field of play.

Service Animals

Service animals are defined as dogs that are individually trained to do work or perform tasks for people with disabilities. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, or alerting and protecting a person who is having a seizure, reminding a person with mental illness to take prescribed medications, calming a person with Post Traumatic Stress Disorder (PTSD) during an anxiety attack, or performing other duties. Service animals are working animals, not pets. The work or task a dog has been trained to provide must be directly related to the person's disability. Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals under the Americans with Disabilities Act (ADA).

Note: Per USAA Policy, Emotional Support Animals, which differ from Service Animals, do not enjoy the same legal status as service animals per the ADA, and are not allowed on the field of play.

Where Service Animals Are Allowed

Per the ADA, State and local governments, businesses, and nonprofit organizations that serve the public generally must allow service animals to accompany people with disabilities in all areas of the facility where the public is normally allowed to go.

At USA Archery events, service animals are allowed in the archers' area, which is defined as any place the archer is allowed. Archers needing accommodation outside of these guidelines are to be managed on a case by case basis.

Service Animals Must Be Under Control

Per the ADA, service animals must be harnessed, leashed, or tethered, unless these devices interfere with the service animal's work or the individual's disability prevents using these devices. In that case, the individual must maintain control of the animal through voice, signal, or other effective controls.

Inquiries, Exclusions, Charges and Other Specific Rules Related to Service Animals

- When it is not obvious what service an animal provides, only limited inquiries are allowed. Staff may ask two questions: (1) is the dog a service animal required because of a disability, and (2) what work, or task has the dog been trained to perform. Staff cannot ask about the person's disability, require medical documentation, require a special identification card or training documentation for the dog, or ask that the dog demonstrate its ability to perform the work or task.
- Allergies and fear of dogs are not valid reasons for denying access or refusing service to people using service animals. When a person who is allergic to dog dander and a person who uses a service animal must spend time in the same room or facility, for example, in a school classroom or at a homeless shelter, they both should be accommodated by assigning them, if possible, to different locations within the room or different rooms in the facility.
- A person with a disability cannot be asked to remove their service animal from the premises unless: (1) the dog is out of control and the handler does not take effective action to control it or (2) the dog is not housebroken. When there is a legitimate reason to ask that a service animal be removed, staff must offer the person with the disability the opportunity to obtain goods or services without the animal's presence.
- Establishments that sell or prepare food must allow service animals in public areas even if state or local health codes prohibit animals on the premises.
- People with disabilities who use service animals cannot be isolated from other patrons, treated less favorably than other patrons, or charged fees that are not charged to other patrons without animals. In addition, if a business requires a deposit or fee to be paid by patrons with pets, it must waive the charge for service animals.
- If a business such as a hotel normally charges guests for damage that they cause, a customer with a disability may also be charged for damage caused by themselves or their service animal.

- Staff are not required to provide care or food for a service animal.
